Internal & External Porcelain | Stone Mosaic

Manciano

Material: Rectified Porcelain | Use: Wall & Floor | Size: 300x600mm, 600x600mm & 600x1200mm

Our Manciano Technical Porcelain range is the epitome of full-bodied unglazed porcelain stoneware. This series can be used on both walls and floors. The ideal solution for high traffic commercial areas subjected to significant stress due to its very high wear rating. Suitable for internal & external applications.

With a Pendulum Test Value (PTV) rating +36, Manciano Technical Porcelain is suitable for dry, wet or humid areas, and is available in 3 different 10mm size options to meet the emerging trend for larger format tiles, all from our UK stock.

Acapulco

Material: Glazed Rectified Porcelain | Use: Wall & Floor - Internal & External | Size: 400x800mm

Acapulco is a stunning Italian stone effect porcelain range printed using HD Inkjet technology to look just like flagstone in a large 400x800mm (10mm) size. Its R10C slip rating means that it can be used for intermittent wet areas including kitchens, bathrooms and changing rooms as well as standing water areas such as pool surrounds and pool ramps.

Ecuador

Material: Rectified Full Body Porcelain | Use: Wall & Floor - Internal & External | Size: 802x802mm

Ecuador is a superb Italian manufactured matt tile, created using the very latest Dynamic HD Imaging™ inkjet technology process, resulting in this very natural stone appearance. In a size of 802x802mm, this collection looks equally at home in a rustic or modern setting. Due to its high wear rating it can be used in residential and commercial areas, including high traffic public areas.

Viana

Material: Full Body Porcelain | Use: Wall & Floor - External Only (20mm) | Size: 600x900mm

If you are looking to create an outdoor space that's every bit as stylish as your indoor spaces then you'll love the Viana porcelain paving tiles. Available in 2 sizes and 3 contemporary colours with a basalt-like appearance and texture, these rectified porcelain tiles supersede the performance of natural stone thanks to the high technical qualities of porcelain stoneware and are R11 / PTV36 slip rated, extremely hard wearing and virtually maintenance free. The Viana 2cm tiles can be fitted conventionally with tile adhesive, laid onto soft sand, gravel or onto a supporting pedestal system for drainage and service running.

Dolomite

Material: Rectified Porcelain | Use: Wall & Floor - External Only (20mm) | Size: 450x900mm

Dolomite delights in its simplicity and subtle variance. Suitable across all domestic and commercial platforms. The 2cm series is technically superior, has strong environmental credentials, and is suitable for outdoor use.

This porcelain collection can be dry laid on sand, gravel, grass, or installed as raised flooring by using our pedestals.

Pedestals

Our pedestals can be used with different accessories, for higher inclination and sound absorption. Immediate drainage between and under slabs. Resistant to weather, solvents and acids. Services, drainage, conduits - all hidden under porcelain tiles. Resistance over 1500kg. Simple installation. The optional silicone pad offers sound insulation and slip resistance and is made of elastomer material.

Another optional accessory is the slope regulator. These wedge - shaped discs allow adjustment in inclination at the base of the pedestal easily and quickly. Several regulators can be coupled together to achieve a level finish where the substrate is uneven. With each regulator, we can obtain maximum unevenness of 1.5%. For each regulator, the pedestal is lifted by 3 mm.

Non-adjustable fixed pedestals are 10 and 15mm high. These can be fitted to each other to reach the height required and are compatible with pads, and all adjustable pedestals. Suitable for use with any 20mm thickness ranges.

Clips

- 1 Easy installation of pipes and wires
- 2 Acts as an expansion joint
- 3 Passable pavement resistant to passing
- 4 Light covers
- 5 Complete flatness of the floor
- 6 Complete flatness of the floor
- 7 Perfect water disposal
- 8 Greater acoustic insulation
- 9 Entirely registrable raised floor

PIECES

- 1 **Pad**
Pad made of an elastomer material offers better noise and slipping resistance.
- 2 **Head**
Head may of polypropylene with charges. Provided with 4mm spacers. The thread offers resistance over 1,500 kg.
- 3 **Locknut**
The locknut blocks the Pedestal to avoid being loosened over time.
- 4 **Floating nut**
The floating nut allows the adjustable Pedestal to be lifted or lowered without rasing the tile. The nut is subject to pressure avoiding the Pedestal from being disassembled.
- 5 **Bushing**
Supplement to raise the adjustable Pedestal by 50mm. Can be coupled and lifted until the height wanted.
- 6 **Base**
Adjustable Pedestal. Water outlets to prevent from water accumulation in it. The holes on the base facilitate its fixing to the floor with polyurethane if necessary.
